(typ.)

1) Mark axes of lower and
upper wall mount Back channels
on the wall – per dimensions
noted on the installation
drawing.

2) Drill upper and lower holes
in a wall by following hole
pattern of the Back channel
part – use corresponding Back
channel as template.

Back channel

3) Install both upper and lower
Back channels to the wall with
supplied dowels and screws
ensuring the proper horizontal
position.

*** For models with downlight
console, ensure the power
cable is available within the
upper Back channel.

Front channel

Vertical rail

Back support
connector

4) On the table top – fasten
botz upper and lower Back
