

A photograph of a modern retail clothing store. The background is a wall of vertical wood slats. In the foreground, there are several clothing racks. On the left, a rack holds a light blue button-down shirt and a dark grey shirt. In the center, a rack holds a row of shirts in various colors (dark grey, light blue, white). On the right, a white button-down shirt is displayed on a hanger. A black track lighting fixture is mounted on the wall above the racks.

Modular retail shelving systems

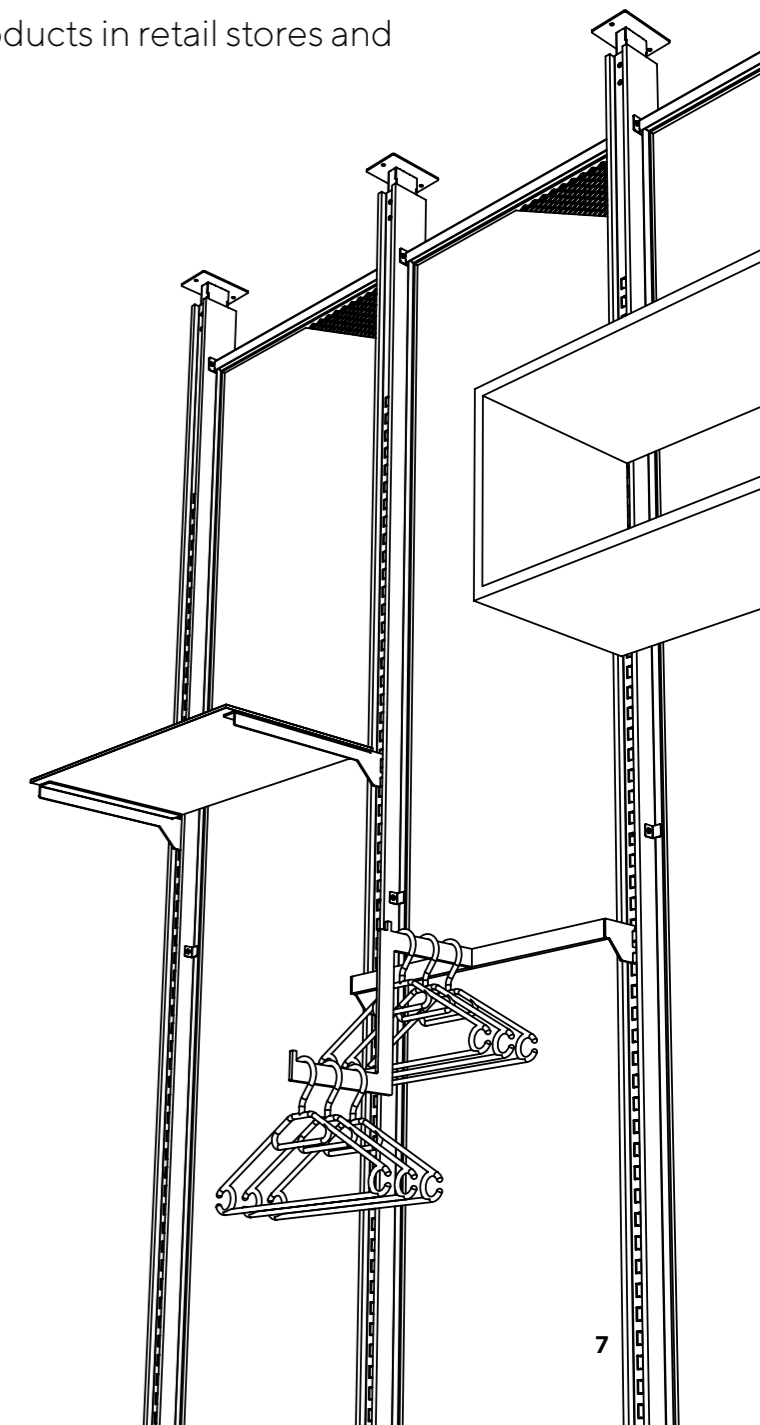

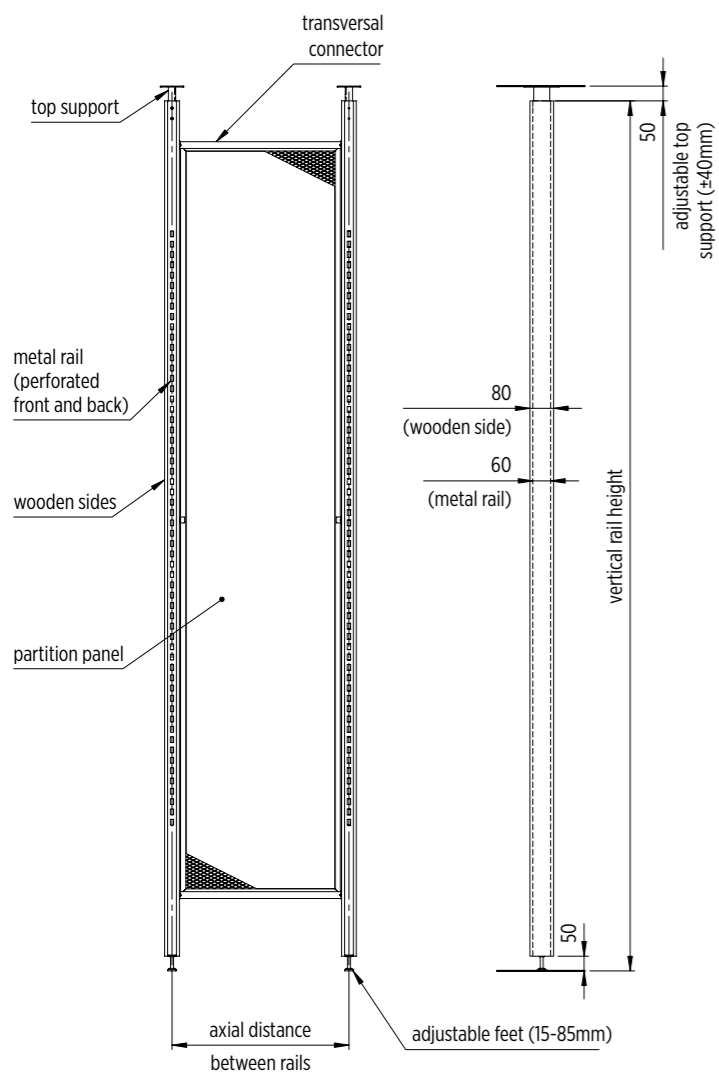

Partition shelving systems

Explore our unique collection and find the right shelving system for your store. Al-Lux manufactures unique shelving systems with movable, height - adjustable shelves and clothing rails for exhibiting clothes, garments, uniforms and other products in retail stores and boutiques.

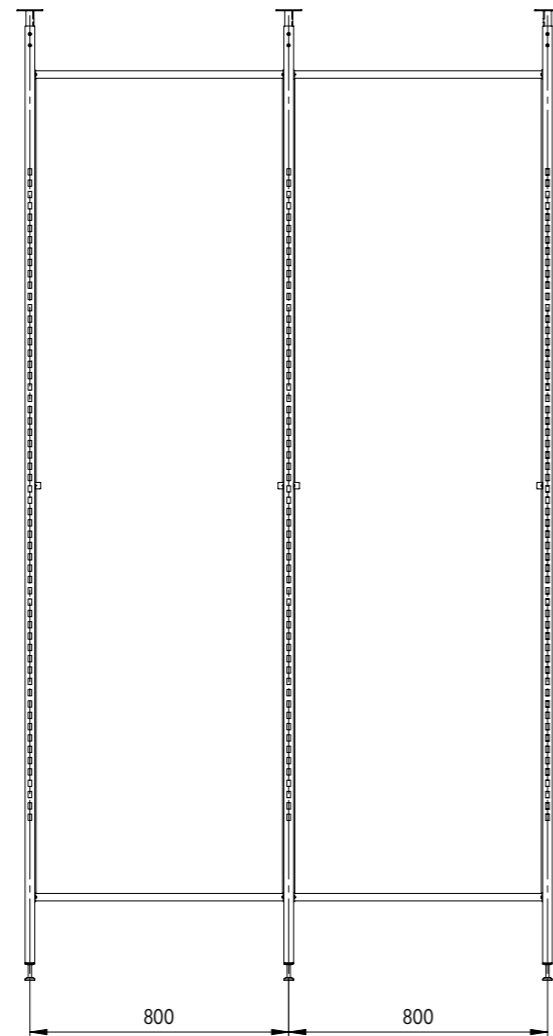

This system makes the most use of the presenting area and it is adaptable to any clients vision or project. The dimensions of the system and combinations of shelves are adaptable to any interior.

■ 600mm vertical rails axial distance

■ 800mm vertical rails axial distance. Option without wooden sides.

This modern solution ensures that your space will be highly aesthetic, stylishly recognizable, functional and perfectly tailored to the needs of your business.

DESIGNATION / ORDERING CODES

SPS - 2950 - MM - WS - 600 - 3 - 1

1 2 3 4 5 6 7

1 **SPS** : Shelving Partition-mount System

2 **2600 - 2950** : Vertical rail height (in millimeters measured from floor). 2950 mm vertical rail supplied as a standard. Heights from 2600 to 2950mm available.

3 **MM** : Metal mesh partition
WB : Wood board partition
C : Custom layout of the partition panels

* Consult factory if custom layout of the partition panels is required

4 **WS** : Option with wooden sides.
X : Option without wooden sides.

5 **600 or 800** : Vertical rails axial distance in millimeters.

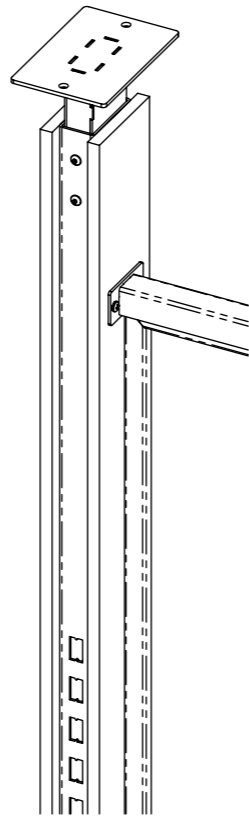

6 **2 or more** : Number of vertical rails

7 Surface finish options:
 1 : Raw/unfinished
 2 : Black (RAL 9005 matte)
 3 : White (RAL 9010 matte)
 4 : Anthracite (RAL 7016 matte)

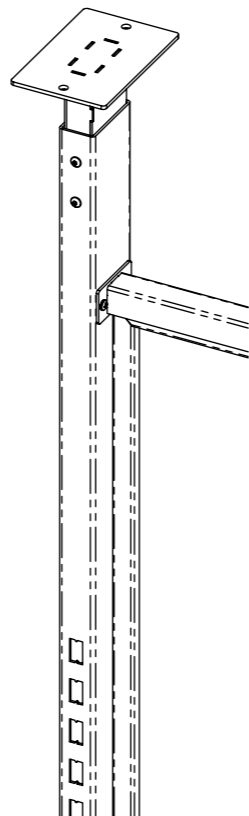

The system contains structural vertical rails that can be manufactured to desired height. The rails can be powder coated metal or powder coated metal with wooden sides. Choice of intermediate panels from metal mesh to wood board gives desired appearance. Shelves and rails can be selected in the matching materials.

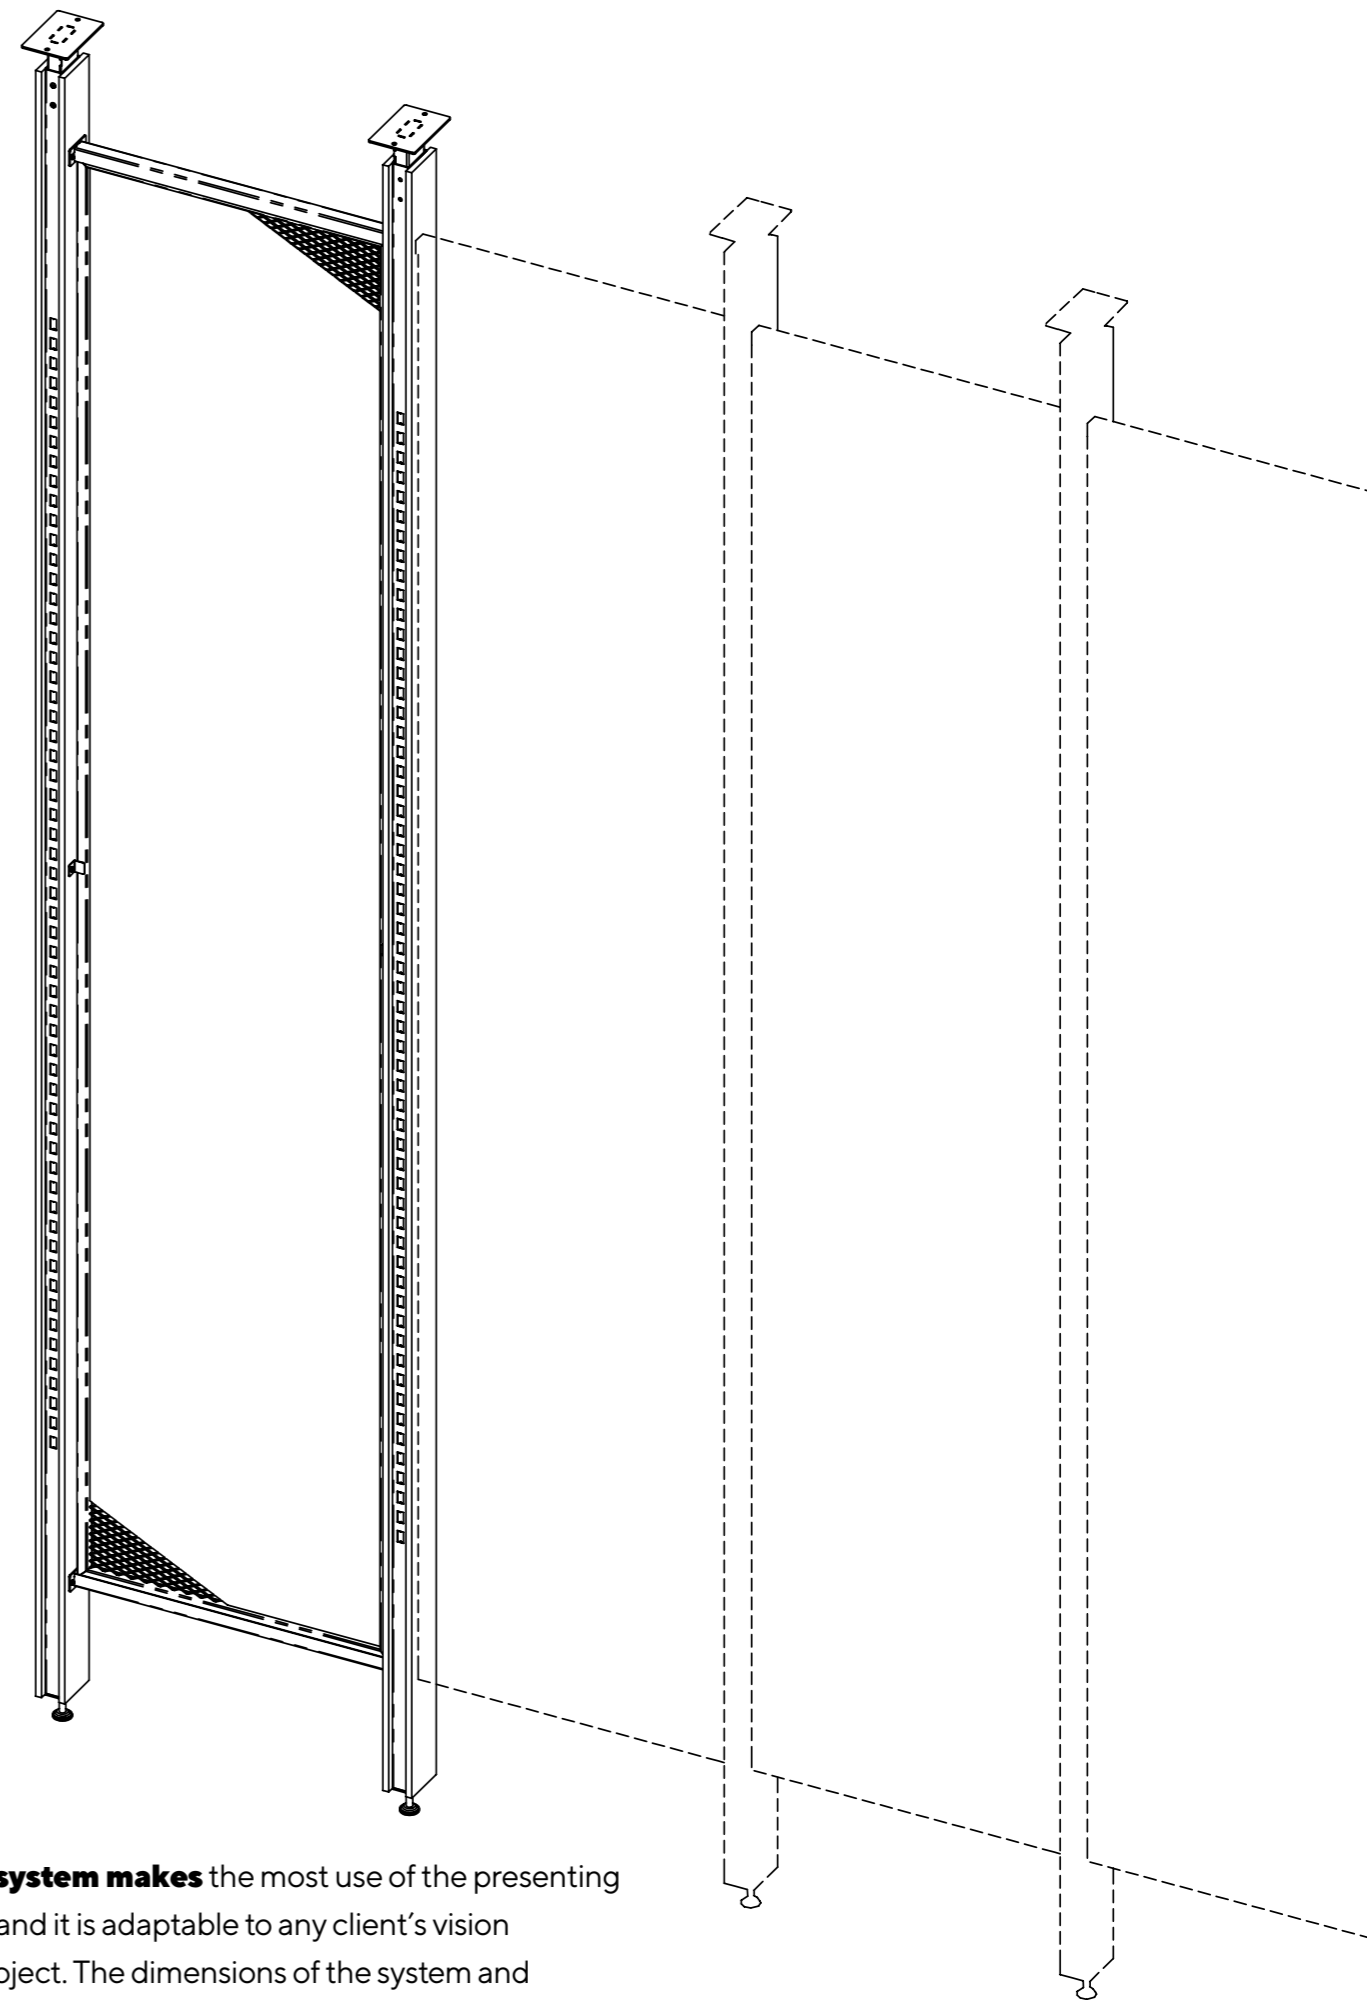

■ With wooden sides

■ Without wooden sides

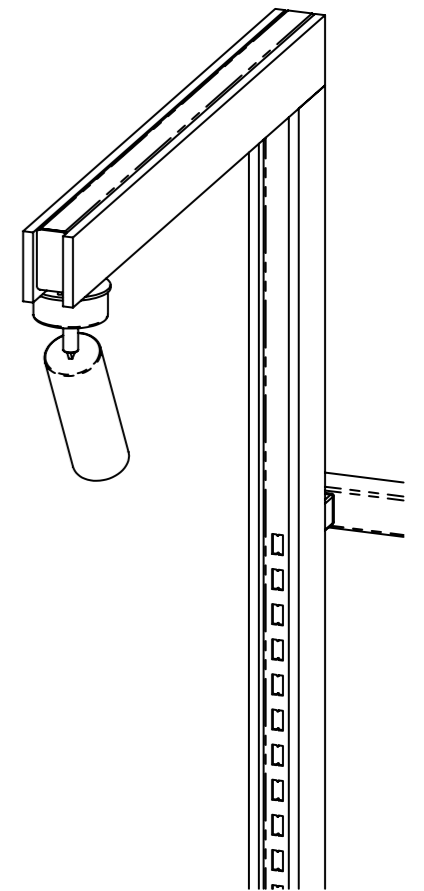

The system makes the most use of the presenting area and it is adaptable to any client's vision or project. The dimensions of the system and combinations of shelves are adaptable to any interior.

Wall shelving systems

The wall system contains wall structural elements installed on to a wall surface and a wide choice of shelves (wooden or glass) and rails for clothing that can be organized in numerous ways according to client's needs and creativity.
